

# peter solomon design

sport illumination furniture systems transport domestic hi-tech machines exhibition

the multi-disciplinary experience of peter solomon design enhances the value of the products designed, subsequently elevating the identity of the manufacturer. the studio offers the elegance and personality inherent to italian design, while providing a trustworthy american technical foundation.

the application of creativity and innovation to the industrial product, the studio's objective, is enriched by careful analysis of; market strategy, trends, production capabilities, and product-person interaction. concepts are brought to production aided by a high knowledge of materials, production methods, costs, and product composition.

having successfully designed for a variety of market sectors, peter solomon design's rich experience provides an exchange of information which can stimulate even the companies most bound by sectorial limits.

depending on the demands of each product the studio may unite a unique team of designers, engineers, color experts, graphic designers, and web experts to fulfill the company's needs.
